Quang,

Sorry so long on the response...

Items 1 & 2 - can be discussed in the Core Meeting. I already set aside some time to discuss PERF related issues.
Item 3 - PRL 354 site visit will be immediately following the regular BCT meeting
Item 4 - IRP 16 monitoring wells can be discussed during the regular BCT meeting.

R, Deb

Subject: Misc Items for Tomorrow

Hi Deb,

Below are a few items I would like for us to cover tomorrow. Please tell me how we could best do them.

1. The RWQCB signature block on the Project Environmental Review Form (PERF) form. This is not a time-critical issue but should be resolved before the next signing of a PERF.
2. DTSC provided comments on the Site 1 Environmental Summary Document some time ago. When can we expect a response?
3. I would like to visit PRL 354 to see what it looks like. We can do it after we are done with the BCT meeting.
4. Discuss soil gas sampling at Site 16 monitoring wells.

Thanks,
Quang
